

HIGH PERFORMANCE KVM-OVER-IP SOLUTION

The Dominion® KX III is an enterprise-class KVM-over-IP switch that provides 1, 2, 4 or 8 users with remote BIOS-level control of 8 to 64 servers. It comes with standard features such as DVI/HDMI/DisplayPort/USB-C digital and analog video, audio, virtual media, smart card/CAC with new smartcard/CAC/PKI login to KX III, blade server support, and mobile access. Deploy it alone, or with Raritan's CommandCenter® Secure Gateway (CC-SG) for centralized access to all KX IIIs; or with the KX III or IV User Stations for high performance access.

IT, DATA CENTERS AND LABS

Eliminate trips to the data center! Java-free Virtual Media lets administrators remotely install software, transfer files, and back up data. Manage up to 8 serial devices with the new Dominion Serial Access Modules (DSAM). Users can even access and manage servers via Apple iOS devices directly or through Raritan's CommandCenter Secure Gateway.

BROADCAST AND ENTERTAINMENT

The KX III's next generation video processing engine supports dynamic broadcast applications that require 1920x1200 HD resolution, 24 bit color, digital audio, dual monitors and DVI, HDMI, DisplayPort, USB-C and VGA video. View streaming 1080p video at 30 frames-per-second over your LAN. Two high performance IP User Stations available for labs, studios, and control rooms. Fast connections and sub-second switching available with the DKX3-808 model.

MILITARY GRADE SECURITY AND RELIABILITY

KX III meets widely used U.S. and Canadian government security mandates like: FIPS 140-2 certified cryptographic module, smart-card/CAC with new smartcard/CAC/PKI login to KX III, two factor RSA SecurID and IEEE 802.1X authentication, and IPv6. And with dual power supplies and dual gigabit Ethernet ports, it is the most reliable and secure digital KVM switch in the industry.
